Firewall / Rules / Edit

Edit Firewall Rule

Action Pass
Choose what to do with packets that match the criteria specified below.
Hint: the difference between block and reject is that with reject, a packet (TCP RST or ICMP port unreachable for UDP) is returned to the sender, whereas with block the packet is dropped silently, in either case, the original packet is discarded.

Disabled ☐ Disable this rule
Set this option to disable this rule without removing it from the list.

Interface WINDOWS10_PC1_10_1_1_1_HR
Choose the interface from which packets must come to match this rule.

Address Family IPv4
Select the Internet Protocol version this rule applies to.

Protocol Any
Choose which IP protocol this rule should match.

Source

Source ☐ Invert match Any Source Address /

Destination

Destination ☐ Invert match Any Destination Address /
