

- Development the SOC lab by adding another HOST (LAPTOP2) to host the SPLUNK SIEM VM to reduce the loading on the first HOST (LAPTOP1):

1- The first HOST (LAPTOP1):

Customize settings for each type of network

You can modify the firewall settings for each type of network that you use.

Private network settings

- ☒ Turn on Windows Defender Firewall
- ☐ Block all incoming connections, including those in the list of allowed apps
 - ☐ Notify me when Windows Defender Firewall blocks a new app
- ☒ Turn off Windows Defender Firewall (not recommended)

Public network settings

- ☒ Turn on Windows Defender Firewall
- ☐ Block all incoming connections, including those in the list of allowed apps
 - ☐ Notify me when Windows Defender Firewall blocks a new app
- ☒ Turn off Windows Defender Firewall (not recommended)

Control Panel Home

Allow an app or feature through Windows Defender Firewall

- Change notification settings
- Turn Windows Defender Firewall on or off
- Restore defaults
- Advanced settings
- Troubleshoot my network

Help protect your PC with Windows Defender Firewall

Windows Defender Firewall can help prevent hackers or malicious software from gaining access to your PC through the Internet or a network.

Update your Firewall settings

Windows Defender Firewall is not using the recommended settings to protect your computer.

[What are the recommended settings?](#)

Use recommended settings

Private networks

Connected

Networks at home or work where you know and trust the people and devices on the network

Windows Defender Firewall state:	Off
Incoming connections:	Block all connections to apps that are not on the list of allowed apps
Active private networks:	- WE_T-C-A1 T - WE_T-C-A1 T - WE_T-C-A1 T
Notification state:	Notify me when Windows Defender Firewall blocks a new app

Guest or public networks

Connected

Networks in public places such as airports or coffee shops

Windows Defender Firewall state:	Off
Incoming connections:	Block all connections to apps that are not on the list of allowed apps
Active public networks:	- Network P - Network P - Network P - Network P

2- The second HOST (LAPTOP2):

The screenshot shows the Windows Settings application, specifically the 'About' page. The left sidebar contains the 'System' category and a list of system settings: Display, Sound, Notifications & actions, Focus assist, Power & sleep, Battery, Storage, Tablet, Multitasking, Projecting to this PC, Shared experiences, System Components, and Clipboard. The main content area is titled 'About' and includes the text 'Your PC is monitored and protected.' and a link to 'See details in Windows Security'. Below this, there are four summary cards: Installed RAM (8.00 GB), Processor (Intel(R) Core(TM) i5-6300U CPU @ 2.40GHz), Graphics Card (128 MB), and Storage (238 GB). A section titled 'DESKTOP-I2OTBOR' with the model 'HP ProBook 650 G2' includes a 'Rename this PC' button. Below this is a 'Device Specifications' section with a 'Copy' button. The specifications table lists: Device Name (DESKTOP-I2OTBOR), Processor (Intel(R) Core(TM) i5-6300U CPU @ 2.40GHz 2.50 GHz), Installed RAM (8.00 GB (7.88 GB usable)), Graphics Card (Intel(R) HD Graphics 520 (128 MB)), Storage (238 GB SSD SAMSUNG MZVLW256HEHP-000L7), Device ID (B2E37733-1F8D-4612-AC51-8DC9B939F9CC), Product ID (00330-80000-00000-AA857), System Type (64-bit operating system, x64-based processor), and Pen and touch (No pen or touch input is available for this display). On the right, there are links for 'Related settings' (Change product key or upgrade your edition of Windows, Read the Microsoft Software License Terms, BitLocker settings, Device Manager, Remote desktop, System protection, Advanced system settings, Rename this PC (advanced)) and 'Help from the web' (Finding out how many cores my processor has, Checking multiple Languages support, Checking multiple Languages support). At the bottom, there are links for 'Get help' and 'Give feedback'. The taskbar at the bottom shows the Start button, a search bar, and several pinned applications. The system tray on the right shows the temperature (28°C), network status, and the time (01:00).
